

DISHA PATIL

Pune, Maharashtra +91 7666746687 disharp2002@gmail.com [LinkedIn](#) [GitHub](#)

Summary

BE graduate in Electronics & Telecommunication (Honours in AIML) with strong knowledge of Python, SQL, AI/ML, REST APIs, and problem-solving. Experienced in developing AI-based and full-stack applications using Python, YOLOv8, Django, Flutter, and MySQL. Passionate about Data Science, Data Analysis, and Artificial Intelligence.

Education

B.E in Electronics & Telecommunication (Honours in AIML)	2025
Modern Education Society's Wadia College of Engineering, Pune (SPPU)	CGPA: 8.39
HSC	2021
S.S.M.M. Arts Science & Commerce College, Pachora	90.17%

Experience

Flutter Developer Intern at Incubators	May 2025 - Oct 2025
- Worked on cross-platform mobile applications using Flutter and Firebase with scalable architecture and secure authentication systems - Integrated REST APIs and Firebase Firestore for real-time data synchronization and efficient data handling. - Collaborated in Agile development cycles for debugging, UI enhancement, feature implementation, and performance optimization.	

Skills

Programming Languages: Python, JavaScript, SQL, Dart Frontend Technologies: HTML, CSS Mobile Technologies: Flutter Backend: Django, REST APIs	Databases: MySQL, Firebase Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook Concepts & Methodologies: OOP, Agile, Problem Solving, Data Analysis, Machine Learning Basics
---	--

Projects

Sales Performance Analysis Dashboard
<i>Tech Stack: Python, Pandas, NumPy, Matplotlib, SQL, Jupyter Notebook</i>
- Performed data cleaning, transformation, and exploratory data analysis (EDA) on retail sales data to identify trends, patterns, and business opportunities. - Analyzed sales performance, profit margins, customer segments, and regional metrics using Python to derive meaningful business insights. - Developed data visualizations and analytical reports to communicate findings effectively and support data-driven decision-making.

OCR Based Number Plate Recognition using YOLOv8
<i>Tech Stack: Python, YOLOv8, OpenCV, Tesseract OCR, Raspberry Pi, REST API</i>
- Developed an AI-powered number plate recognition system using Python, YOLOv8, OpenCV, and OCR techniques for real-time vehicle monitoring and data extraction. - Designed an end-to-end image processing pipeline using OpenCV and Tesseract OCR to preprocess images, detect license plates, and extract alphanumeric text with high accuracy under varying conditions. - Implemented a scalable alert system to transmit detected vehicle details via WhatsApp, enabling real-time vehicle monitoring and automated alert generation.

MOTTO - Meet Others to Travel Out
<i>Tech Stack: Flutter, Dart, Firebase (Authentication, Firestore), SQLite, REST APIs</i>
- Developed a cross-platform ride-sharing mobile application enabling users to post trips, discover travel companions, and manage bookings with real-time coordination. - Solved real-world challenges such as difficulty in finding reliable travel partners, high travel costs, and inefficient seat utilization through a secure and collaborative ride-sharing platform. - Implemented secure user authentication and profile management using Firebase Authentication, and designed real-time data handling with Firebase Firestore along with SQLite for local caching, offline support, and REST APIs for seamless communication.

Certification

Certificate Course in CyberSecurity	
Microsoft Philanthropies - CyberShikshaa for Educators	August 2024 – October 2024
Learned & applied cybersecurity concepts such as network security, ethical hacking basics, cryptography, and risk assessment using hands-on labs and industry-relevant tools.
