

DISHA PATIL

Pune, Maharashtra +91 7666746687 disharp2002@gmail.com [LinkedIn](#) [GitHub](#)

Summary

Software development graduate with a strong foundation in Python, SQL, and object-oriented programming. Experienced in building scalable applications, REST APIs, and real-time systems using Flutter, Firebase, and Django. Skilled in problem-solving, debugging, and developing data-driven applications, with a keen interest in enterprise-level software solutions.

Education

B.E in Electronics & Telecommunication (Honours in AIML)

Modern Education Society's Wadia College of Engineering, Pune (SPPU)

2025

HSC

S.S.M.M. Arts Science & Commerce College, Pachora

CGPA: 8.39

2021

90.17%

Experience

Flutter Developer Intern at Incubators

May 2025 - Oct 2025

- Developed cross-platform mobile applications using Flutter and Firebase with scalable architecture and secure authentication systems.
- Integrated REST APIs and Firebase Firestore for real-time data handling, improving performance and responsiveness.
- Collaborated in an Agile team to optimize UI, debug issues, and deliver features efficiently.

Skills

- Programming Languages:** Python, Java, JavaScript, SQL, Dart
- Frontend Technologies:** HTML, CSS, React, Bootstrap
- Mobile Technologies:** Flutter
- Backend:** Django, REST API Development
- Databases:** MySQL, Firebase
- Tools:** Git, GitHub, Postman, VS Code
- Concepts & Methodologies:** OOP, Agile, Problem Solving

Projects

MentorHub – Learning & Mentorship Platform

Tech Stack: React.js, Tailwind CSS, Django REST Framework, MySQL, JWT

- Developed a full-stack web platform to connect students with mentors, enabling course management, assignment handling, progress tracking, and real-time communication, addressing the lack of personalized mentorship in online learning.
- Built a responsive frontend using React.js and Tailwind CSS with component-based architecture and efficient state management, and implemented secure RESTful APIs using Django REST Framework with JWT-based authentication and role-based access control.
- Designed a MySQL relational database with optimized schema and integrated real-time chat functionality (WebSockets or similar) to enhance user engagement and ensure efficient data handling and communication.

OCR Based Number Plate Recognition using YOLOv8

Tech Stack: Python, YOLOv8, OpenCV, Tesseract OCR, Raspberry Pi, REST API

- Developed a real-time number plate recognition system using YOLOv8, optimized for efficient execution on low-power devices like Raspberry Pi, enabling automated vehicle monitoring.
- Designed an end-to-end image processing pipeline using OpenCV and Tesseract OCR to preprocess images, detect license plates, and extract alphanumeric text with high accuracy under varying conditions.
- Implemented a scalable alert system by integrating APIs to transmit detected vehicle details via WhatsApp, supporting real-time traffic surveillance, smart parking, and security applications.

MOTTO - Meet Others to Travel Out

Tech Stack: Flutter, Dart, Firebase (Authentication, Firestore), SQLite, REST APIs

- Developed a cross-platform ride-sharing mobile application enabling users to post trips, discover travel companions, and manage bookings with real-time coordination.
- Solved real-world challenges such as difficulty in finding reliable travel partners, high travel costs, and inefficient seat utilization through a secure and collaborative ride-sharing platform.
- Implemented secure user authentication and profile management using Firebase Authentication, and designed real-time data handling with Firebase Firestore along with SQLite for local caching, offline support, and REST APIs for seamless communication.

Certification

Certificate Course in CyberSecurity

Microsoft Philanthropies - CyberShikshaa for Educators

August 2024 – October 2024

Learned & applied cybersecurity concepts such as network security, ethical hacking basics, cryptography, and risk assessment using hands-on labs and industry-relevant tools.
